OMNIRES STEEL-R45

Quality in every touch

Flush plates from the OMNIREES STEEL-R45 collection, designed by Paulina Shacalis, stand out for their impeccably refined detailing and smooth, intuitive operation. Crafted from high-grade stainless steel, they ensure durability and reliability even under intensive use. Available in a palette of fourteen finishes, the flush plates offer extensive freedom in shaping the aesthetics of a space, and when paired with the STRONGFRAME ECO frame, they support responsible water management.

”

While designing this collection, I aimed to create a product of the highest quality, offering a truly refined user experience.

By using advanced stainless steel welding technologies, we achieved exceptional precision in every detail and a flawlessly finished surface. The flush plates sit seamlessly aligned with the wall, becoming a subtle architectural element within the space.

Paulina Shacalis, OMNIRE Studio

PERFECTION OF DETAIL

OMNIREX STEEL-R45 flush plates are distinguished by their slim, perfectly proportioned form and meticulously refined finish. Their subtle geometry and clean lines allow them to blend seamlessly into the wall surface, creating a cohesive and elegant composition. "Perfectly fitted elements operate smoothly and almost imperceptibly, revealing the care with which their internal mechanisms were designed. Every touch conveys a tangible sense of exceptional, lasting quality" – comments Paulina Shacalis.

MATERIAL DURABILITY

Manufactured from high-grade stainless steel, the OMNIREES STEEL-R45 flush plates are highly resistant to mechanical damage and moisture, ensuring durability and a flawless appearance even under intensive use. The carefully refined surface highlights the precision of craftsmanship, while the strength of the material guarantees reliable performance and a consistent aesthetic for years to come.

NOBLE FINISH

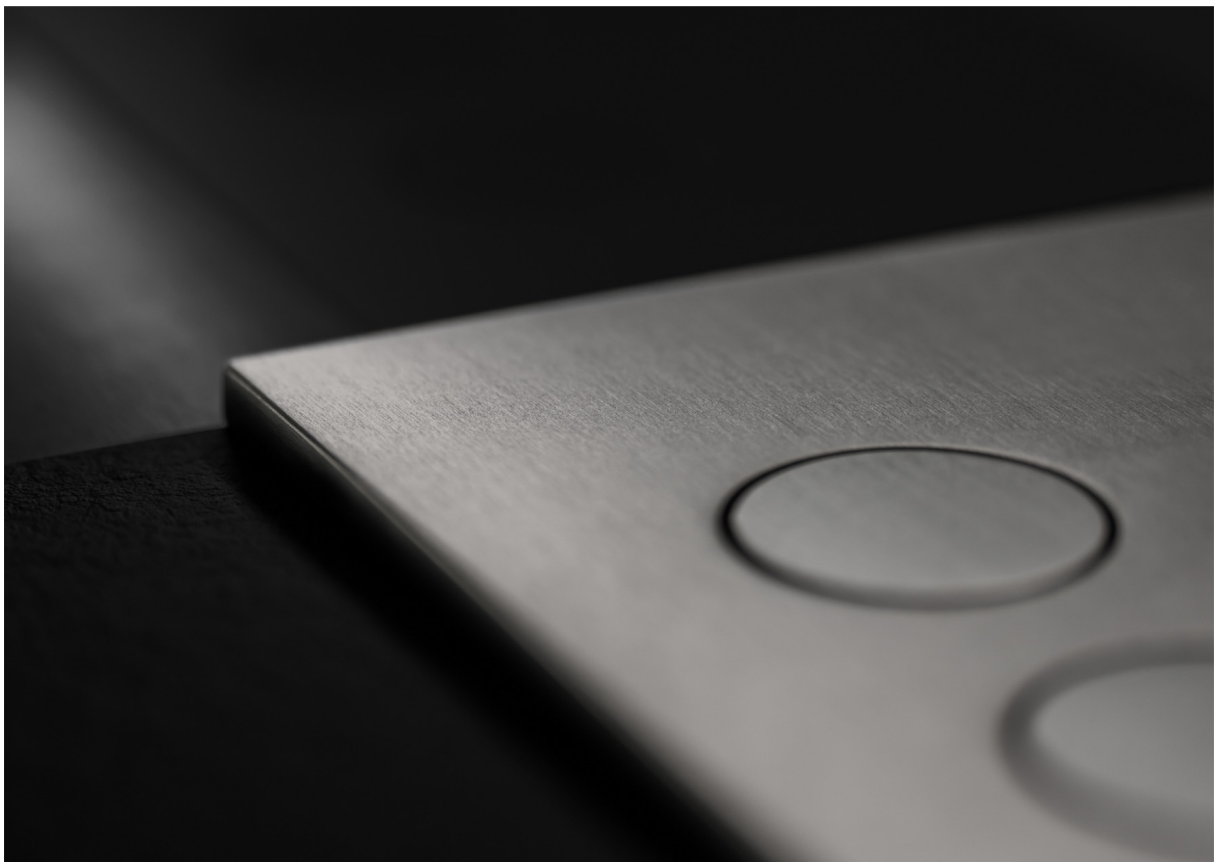

The finishes of STEEL-R45 flush plates align with the colour palette of OMNIRE'S fittings and accessories, ensuring visual harmony throughout the interior. The collection includes fourteen variants – brushed, matt, and polished – each offering a distinct visual and tactile character. Depending on the finish, the surface interacts with light in different ways – diffusing or reflecting it – which subtly alters the perception of detail. As a result, the flush plates can either remain a subtle background for the interior architecture or become a distinct, material accent within the composition.

The STEEL-R45 flush plates are available in fourteen colour finishes

ENVIRONMENTALLY FRIENDLY TECHNOLOGY

When combined with the OMNIRES STRONGFRAME ECO concealed frames and SILENT POWER™ toilet bowls, the OMNIRES STEEL-R45 flush plates form a comprehensive installation system designed for efficient flushing with reduced water consumption – using as little as 2 or 4 litres per flush. The dual-flush mechanism enables precise water dosing, supporting more conscious resource management and the efficient operation of sanitary systems.

ABOUT THE DESIGNER

Paulina Shacalis, Managing and Creative Director of the OMNIREES brand, is a product designer, strategist and visionary. She oversees the brand's design and strategic direction. Her collections of baths, basins and fittings have received widespread recognition in both national and international competitions, including the Red Dot Design Award, German Design Award, Must Have and Dobry Wzór. Treating her designs as a form of art, she simultaneously emphasises functionality and the product life cycle. Paulina believes that true success in the architecture sector stems from innovation and a passion for outstanding and conscious design.

ABOUT US

OMNIREs is a respected Polish manufacturer of premium bathroom and kitchen fittings, offering a broad range of high-quality solutions distinguished by exceptional design. Founded in 1990, the brand's mission is to empower others to create thoughtful, inspiring interiors.

Each product is developed with meticulous attention to detail and life-cycle analysis, incorporating technologies that promote water and energy efficiency. Created in collaboration with renowned designers, OMNIREs collections stand out for their distinctive aesthetics, innovative materials and advanced engineering.

The brand's international reputation is confirmed by numerous Red Dot, iF and German Design Awards.
