OMNIRES

BEYOND | 5-hole bath mixer

Finish: polished gold / brushed GLGLB)

Designed by Maja Ganszyniec, BEYOND is part of the OMNIRES Signature Collection – a portfolio representing the fullest expression of the brand's design ambitions. Its distinctive form draws on modernism, combining clarity of geometry with subtle understated curves. The slender spout, the slim, round knobs with their rosette-free design, and the minimalist hand shower create an elegant, architectural composition of exceptional visual lightness. The cascading stream, reminiscent of a natural waterfall, gently envelops the skin and brings a sensual dimension to everyday rituals.

Made from high-grade brass and fitted with high-quality ceramic cartridges, the mixer combines durability with reliable performance. It enables a choice between filling the bath and using the hand shower, while markings on the diverter make it easy to switch smoothly between functions. The aerator in the bath spout creates a soft, air-enriched stream that feels gentle to the touch, while the flow regulator in the hand shower reduces water consumption, supporting the responsible use of resources.

Gold is a refined finish in an elegant, light tone. The distinctive combination of polished and brushed textures across different surfaces creates a subtle play of shifting light reflections, highlighting the depth of the colour and the precision of every detail. The coating was produced using advanced PVD technology.

Design: Maja Ganszyniec, Maja Ganszyniec Studio
Awards: Red Dot Design Award 2025, German Design Award 2027

Certificates: Polish Declaration of Performance (B marking), Polish Hygienic Certificate PZH

Technologies

The mixer is equipped with the highest quality ceramic cartridge which ensures smooth and precise water flow control whilst guaranteeing long term product performance.

The EASY CLEAN nozzles allow the user to easily remove any limescale from the hand shower by simply wiping their silicone surface.

The product is coated using the advanced PVD technology which guarantees the highest possible durability and facilitates cleaning.

Thanks to the AIR WATER technology, the water is soft and pleasant to the touch. The stream does not spray and it is quiet and consistent.

The bath mixer with the integrated SMART FIX system allows for the shower hose to be easily replaced, if desired, without the need to dismount the bath.

The mixer's body, the valve and the rosette are all made of high quality A-grade brass.

Flow characteristics

- working pressure 1-5 bar
- water flow at 3 bar: 26.20 / 8.50 l/min

Specification

- spout reach: 19.3 cm
- water outflow height: 17.3 cm
- brass hand shower, 1-function
- brass flexible shower hose, length: 180 cm

Product care

HOW TO TAKE CARE OF BATHROOM AND KITCHEN FITTINGS?

You should clean your bathroom and kitchen fittings regularly, preferably after each use, so as to prevent the build-up of hard-to-remove dirt. For daily maintenance of external surfaces, use a soft cloth (for example, a microfibre cloth) and a solution of water with a mild cleaning agent with a natural composition. Hard-to-reach recesses and milled details can be gently cleaned with a soft brush. Then rinse the product thoroughly with clean water and wipe it dry. It is not recommended to use rough or abrasive materials and corrosive or bleaching substances to prevent damaging the surface of the product.

For more stubborn dirt, use a 10% citric acid solution with water. Apply this solution directly to the product or cover the product with a cloth soaked in the solution. After 10 minutes, rinse the product thoroughly with clean water and wipe it dry. If necessary, the process can be repeated.

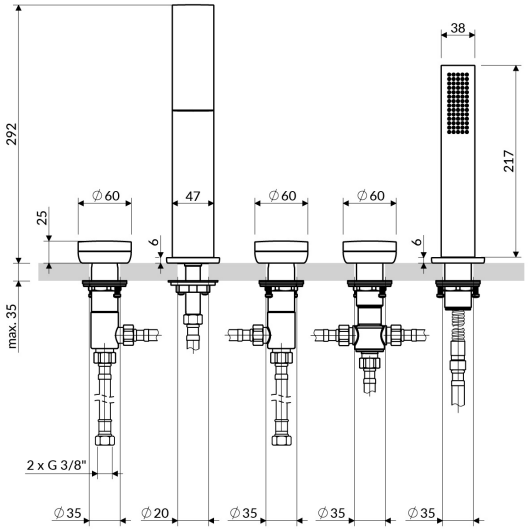

WHAT IS THE BEST METHOD FOR CLEANING THE AERATOR?

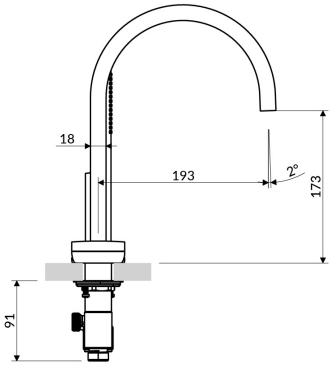

Remember to regularly control the flow of water through the aerator so as to ensure its problem-free operation and protect it from damage. In the case of small contaminants in the water or “hard” water, remove the aerator once every few weeks and clean it with a brush. In the case of more stubborn dirt, we recommend soaking the aerator for 10 minutes in a 10% citric acid solution with water.

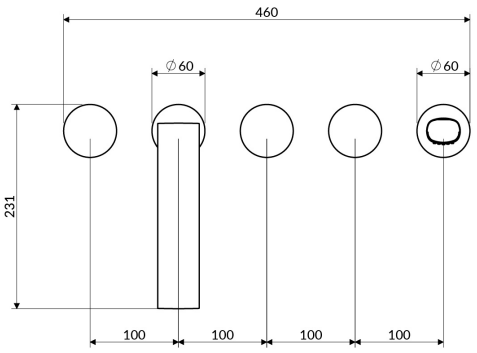

WHAT IS THE MOST EFFECTIVE WAY TO CLEAN A SHOWER ENCLOSURE?

The glass walls of the shower enclosure should be cleaned regularly, preferably after each use, using a soft cloth (for example, a microfibre cloth) and a solution of water with a mild cleaning agent with a natural composition. After cleaning the enclosure, rinse the inner glass surface thoroughly and remove any remaining water with a rubber squeegee or soft cloth. You can clean the outer side of the glass walls using a mirror or glass cleaner. It is important to avoid using rough, abrasive materials and caustic or bleaching substances to prevent damaging the surface of the glass.

To tackle stubborn dirt or limescale deposits, you can use cleaning agents dedicated to shower enclosures. It is recommended to lubricate hinges, joints, guide tracks and rollers at least once a year using technical lubricant or silicone grease to ensure their smooth operation.
