

## CONTOUR | 5-hole bath mixer for concealed installation

---

### Finish: brushed anthracite (AT)

The OMNIRES CONTOUR bath mixer for concealed installation with integrated hand shower intrigues with its extravagant form and decorative details. An austere, architectural design with a diamond milling marvels with the sophisticated combination of textures and perfect workmanship. Thanks to its symmetric form, the bath mixer and the bath are perfectly tuned, creating a harmonious composition. The concealed installation guarantees the economy of space and the ease of cleaning.

Made of high grade brass, the mixer is equipped with a superior quality ceramic cartridge.

Anthracite is a modern finishing in a deep metallic shade, with a satin, brushed surface. The product is coated using the advanced PVD technology.

Design: Paulina Shacalis, OMNIRES Studio  
Awards: Red Dot Design Award, Must Have  
Distinctions: Dobry Wzór

## Technologies

---

The mixer is equipped with the highest quality ceramic cartridge which ensures smooth and precise water flow control whilst guaranteeing long term product performance.

The EASY CLEAN nozzles allow the user to easily remove any limescale build up by simply wiping their silicone surface.

The product is coated using the advanced PVD technology which guarantees the highest possible durability and facilitates cleaning.

The mixer's body, the valve and the rosette are all made of high quality A-grade brass.

## Flow characteristics

---

- working pressure 1-10 bar
- water flow at 3 bar: 26 l/min
- hot water supply: max. 90 °C

## Specification

---

- rosette dimensions: 48 x 8 cm
- spout reach: 20.5 cm
- minimum wall depth: 7 cm
- two 1/2" inlets (hot and cold water)
- brass hand shower, 1-function
- stainless steel flexible shower hose, length: 125 cm
- built-in parts included

## Product care

---

### How to take care of bathroom and kitchen fittings?

You should clean your bathroom and kitchen fittings regularly, preferably after each use, so as to prevent the build-up of hard-to-remove dirt. For daily maintenance of external surfaces, use a soft cloth (for example, a microfibre cloth) and a solution of water with a mild cleaning agent with a natural composition, then rinse the product thoroughly with clean water and wipe it dry. It is not recommended to use rough or abrasive materials and corrosive or bleaching substances to prevent damaging the surface of the product.

For more stubborn dirt, use a 10% citric acid solution with water. Apply this solution directly to the product or cover the product with a cloth soaked in the solution. After 10 minutes, rinse the product thoroughly with clean water and wipe it dry. If necessary, the process can be repeated.

### What is the best way to care for a hand shower ?

Remember to regularly wipe the silicone nozzles with your hand to remove any limescale deposits that might be forming on their surface. A toothpick or toothbrush can also be used to clean the spaces in between if there is a considerable build-up of limescale.

For more stubborn dirt, it is recommended to immerse the hand shower in a 10% citric acid solution with water for about 10 minutes to soften the limescale and then wipe across the nozzles with a soft brush. It is not recommended to use rough or abrasive materials and corrosive or bleaching substances to prevent damaging the surface of the product. From time to time, it is recommended to unscrew the hand shower and flush it from the inside to remove any dirt preventing the flow of water.
