OMNIRES

SHELL M+ | composite undercounter basin, 38 x 25 cm

Finish: matt dune beige (DB)

The undercounter basin from the OMNIRES SHELL M+ collection features a sleek, contemporary elliptical design that gently tapers toward the base. Its compact dimensions make it a perfect choice for small bathrooms and toilet rooms. The accurately designed rim allows the basin to be mounted under the countertop, ensuring a smooth, uniform surface. Alternatively, the basin can be installed flush with the countertop, with only a minimalist rim visible on the surface. Both mounting solutions simplify daily maintenance and maximize space, making the basin an ideal choice for interiors that value meticulous detail and efficient space utilization.

The basin is made of a composite material M+ whose main component is dolomite rock. The innovative production technology guarantees impeccable execution of every detail while ensuring remarkable durability and resistance.

SHELL in dune beige (RAL 1019) is a basin in a muted, earthy beige tone with a soft, velvety matte finish.

Design: Pawlak & Stawarski Studio

Certificates: European Declaration of Performance (CE marking), Polish Hygienic Certificate PZH

Technologies

The product is made of an innovative composite material, M+, which is exceptionally durable, as well as resistant to damage, pressure and extreme temperatures.

The material provides highly desirable, precise finishing. Product surface is perfectly smooth and even, and dimensions precisely match the technical drawing (tolerance 0-3 mm).

Perfectly smooth product surface is free from any ruptures of micro openings, where bacteria and germs could grow. It is also easy to clean and maintain.

The product is very pleasant to the touch. The satin finish resembles a smooth stone that has been polished by water.

Product surface is warm to the touch. Water maintains its temperature for longer, both maximising the user experience and saving energy.

Thanks to its high density, M+ composite provides exceptional acoustic absorption. Sound of the falling water is minimised.

Specification

- internal length: 38 cm
- internal width: 25 cm
- depth: 10 cm
- external length: 45 cm
- external width: 32 cm
- height: 14 cm
- no overflow
- drain cover included
- basin waste not included
- capacity: 5.2 l
- net weight: 4.46 kg
- gross weight: 4.77 kg

- to mount the basin, cut a hole in the countertop according to the installation instructions

Product care

HOW TO PROTECT AND CLEAN COMPOSITE AND CERAMIC PRODUCTS?

Products made from M+ composite material and ceramics should be cleaned regularly, preferably after each use, so as to prevent the build-up of hard-to-remove dirt. For daily maintenance of external surfaces, use a soft cloth (for example, a microfibre cloth) and a solution of water with a mild cleaning agent with a natural composition, then rinse the product thoroughly with clean water and wipe it dry. It is not recommended to use rough or abrasive materials and corrosive or bleaching substances to prevent damaging the surface of the product.

For more stubborn dirt, use a 10% citric acid solution with water. Apply the solution to the product for 2 to 3 minutes. After that time, rinse the product thoroughly with clean water and wipe it dry. If necessary, the process can be repeated. Residues from hair dye, lipstick or other products with a dyeing effect should be removed from the surface immediately to prevent the formation of permanent marks.
