OMNIRES

OVO M+ | corner bathtub - left, 165 x 83 cm

Finish: matt ash grey (AG)

The corner bath from the OMNIRES OVO collection embodies a minimalist yet striking aesthetic, distinguished by its impeccable proportions. Inspired by a playful approach to geometry, the design combines a softly rounded, elongated bath with a rectangular shelf for stylishly storing bathroom essentials. A flat edge along the outer walls accentuates the clean, sculptural form, while the front is suitable for fitting a bath screen. The inner profile of the bath provides comfortable back support, while the elongated base offers ample space for a relaxed leg position.

The bath's recessed setting is ideal for bathing children and makes getting in and out of the bath much easier. It features functional solutions such as a perfectly matching click-clack bath waste and a centrally located waste.

The bath is made of a composite material M+ whose main component is dolomite rock. The innovative production technology guarantees impeccable execution of every detail while ensuring remarkable durability and resistance.

OVO bath in ash grey (RAL7022) has a velvety matt surface in an elegant, warm grey hue.

Design: Paulina Shacalis, OMNIRES
Awards: Red Dot Design Award, German Design Award, Design Plus powered by ISH 2023, Must Have, Dobry Wzór

Certificates: European Declaration of Performance (CE marking), Polish Hygienic Certificate PZH

Technologies

The product is made of an innovative composite material, M+, which is exceptionally durable, as well as resistant to damage, pressure and extreme temperatures.

The material provides highly desirable, precise finishing. Product surface is perfectly smooth and even, and dimensions precisely match the technical drawing (tolerance 0-3 mm).

Perfectly smooth product surface is free from any ruptures of micro openings, where bacteria and germs could grow. It is also easy to clean and maintain.

The product is very pleasant to the touch. The satin finish resembles a smooth stone that has been polished by water.

Product surface is warm to the touch. Water maintains its temperature for longer, both maximising the user experience and saving energy.

Thanks to its high density, M+ composite provides exceptional acoustic absorption. Sound of the falling water is minimised.

Specification

- length: 165 cm
- width: 83 cm
- height: 53.5 cm
- double-ended bath
- no overflow
- click-clack bath waste included
- capacity: 351 l
- net weight: 165 kg

- gross weight: 195 kg

Product care

HOW TO PROTECT AND CLEAN COMPOSITE AND CERAMIC PRODUCTS?

Products made from M+ composite material and ceramics should be cleaned regularly, preferably after each use, so as to prevent the build-up of hard-to-remove dirt. For daily maintenance of external surfaces, use a soft cloth (for example, a microfibre cloth) and a solution of water with a mild cleaning agent with a natural composition, then rinse the product thoroughly with clean water and wipe it dry. It is not recommended to use rough or abrasive materials and corrosive or bleaching substances to prevent damaging the surface of the product.

For more stubborn dirt, use a 10% citric acid solution with water. Apply the solution to the product for 2 to 3 minutes. After that time, rinse the product thoroughly with clean water and wipe it dry. If necessary, the process can be repeated. Residues from hair dye, lipstick or other products with a dyeing effect should be removed from the surface immediately to prevent the formation of permanent marks.
