OMNIRES

CADENCE M+ | composite countertop basin, 42 x 37 cm

Finish: matt white (BM)

The countertop basin from the OMNIRES CADENCE collection captivates with its monumental form and the characteristic asymmetrical drain placement. The basin follows a circular shape distinguished by a pronounced undercut at the base and tall, thin edges forming a deep bowl with a perfect depth. Both these features emphasise the basin's contemporary look while enhancing the comfort of use. The basin is designed to be combined with a basin mixer for concealed installation and can be installed either in the centre of the countertop or near the wall.

The basin is made of a composite material M+ whose main component is dolomite rock. The innovative production technology guarantees impeccable execution of every detail while ensuring remarkable durability and resistance.

The silky-smooth matt surface of the basin has a finish in classic white.

Design: Pawlak & Stawarski Studio
Awards: iF Design Award, German Design Award, Top Design Award, Must Have

Certificates: European Declaration of Performance (CE marking), Polish Hygienic Certificate PZH

Technologies

The product is made of an innovative composite material, M+, which is exceptionally durable, as well as resistant to damage, pressure and extreme temperatures.

The material provides highly desirable, precise finishing. Product surface is perfectly smooth and even, and dimensions precisely match the technical drawing (tolerance 0-3 mm).

Perfectly smooth product surface is free from any ruptures of micro openings, where bacteria and germs could grow. It is also easy to clean and maintain.

The product is very pleasant to the touch. The satin finish resembles a smooth stone that has been polished by water.

Product surface is warm to the touch. Water maintains its temperature for longer, both maximising the user experience and saving energy.

Thanks to its high density, M+ composite provides exceptional acoustic absorption. Sound of the falling water is minimised.

Specification

- length: 42 cm
- width: 37 cm
- height: 19 cm
- no overflow
- drain cover included
- basin waste not included
- to be used with basin mixers for concealed installation
- capacity: 16 l
- net weight: 12.42 kg
- gross weight: 13.8 kg

Product care

HOW TO PROTECT AND CLEAN COMPOSITE AND CERAMIC PRODUCTS?

Products made from M+ composite material and ceramics should be cleaned regularly, preferably after each use, so as to prevent the build-up of hard-to-remove dirt. For daily maintenance of external surfaces, use a soft cloth (for example, a microfibre cloth) and a solution of water with a mild cleaning agent with a natural composition, then rinse the product thoroughly with clean water and wipe it dry. It is not recommended to use rough or abrasive materials and corrosive or bleaching substances to prevent damaging the surface of the product.

For more stubborn dirt, use a 10% citric acid solution with water. Apply the solution to the product for 2 to 3 minutes. After that time, rinse the product thoroughly with clean water and wipe it dry. If necessary, the process can be repeated. Residues from hair dye, lipstick or other products with a dyeing effect should be removed from the surface immediately to prevent the formation of permanent marks.
