

SIENA M+ | freestanding basin, 55 x 43 cm

Finish: white / gloss black (BCP)

The freestanding basin from the OMNIREs SIENA collection delights with its monumental profile. The rear has been cut to perfectly stick to the wall, and the whole structure is less space-consuming. The basin will become a central point in the bathroom and will give it an expressive look.

The basin is made of a composite material (M+) whose main component is dolomite rock. The innovative production technology guarantees impeccable execution of every detail while ensuring remarkable durability and resistance.

The gloss black combined with classic white is an original finishing with a shiny surface.

Design: Janusz Langner, OMNIREs Studio

Certificates: European Declaration of Performance (CE marking)

Technologies

The product is made of an innovative composite material, M+, which is exceptionally durable, as well as resistant to damage, pressure and extreme temperatures.

The material provides highly desirable, precise finishing. Product surface is perfectly smooth and even, and dimensions precisely match the technical drawing (tolerance 0-3 mm).

Perfectly smooth product surface is free from any ruptures of micro openings, where bacteria and germs could grow. It is also easy to clean and maintain.

The product is very pleasant to the touch. The satin finish resembles a smooth stone that has been polished by water.

Product surface is warm to the touch. Water maintains its temperature for longer, both maximising the user experience and saving energy.

Thanks to its high density, M+ composite provides exceptional acoustic absorption. Sound of the falling water is minimised.

Specification

- length: 55 cm
- width: 43 cm
- height: 85 cm
- no overflow
- with 1 tap hole
- net weight: 28.16 kg
- gross weight: 31 kg
- basin waste not included (choose)
