

SHELL M+ | freestanding bath, 175 x 78 cm

Finish: matt black lava (BLV)

The freestanding bath from the OMNIRES SHELL M+ collection is characterised by its contemporary elliptical form, softly tapering towards the base. The minimalist body of the bath has a lightweight yet solid look, creating an effect of a monolith carved from rock. Its inner profile was designed to ensure absolute comfort while bathing. The body of the bath features solid and beautifully finished rims with a width of 2 cm. Its low setting is ideal for bathing children and makes getting in and out of the bath much easier. It features convenient solutions such as a matching click-clack waste bath trap and a centrally located waste, which makes the bath perfect for sharing.

The bath is made of a composite material M+ whose main component is dolomite rock. The innovative production technology guarantees impeccable execution of every detail while ensuring remarkable durability and resistance.

SHELL bath in black lava (RAL9005) has a silky-smooth matt surface in a dramatic shade of black.

Design: Pawlak & Stawarski Studio

Technologies

The product is made of an innovative composite material, M+, which is exceptionally durable, as well as resistant to damage, pressure and extreme temperatures.

The material provides highly desirable, precise finishing. Product surface is perfectly smooth and even, and dimensions precisely match the technical drawing (tolerance 0-3 mm).

Perfectly smooth product surface is free from any ruptures of micro openings, where bacteria and germs could grow. It is also easy to clean and maintain.

The product is very pleasant to the touch. The satin finish resembles a smooth stone that has been polished by water.

Product surface is warm to the touch. Water maintains its temperature for longer, both maximising the user experience and saving energy.

Thanks to its high density, M+ composite provides exceptional acoustic absorption. Sound of the falling water is minimised.

Specification

- length: 175 cm
- width: 78 cm
- height: 50 cm
- double-ended bath
- no overflow
- click-clack bath waste included
- capacity: 390 l
- net weight: 108 kg
- gross weight: 138 kg
- installation requires the drilling of a hole to accommodate the bath waste

Product care

How to protect and clean composite and ceramic products?

Products made from M+ composite material and ceramics should be cleaned regularly, preferably after each use, so as to prevent the build-up of hard-to-remove dirt. For daily maintenance of external surfaces, use a soft cloth (for example, a microfibre cloth) and a solution of water with a mild cleaning agent with a natural composition, then rinse the product thoroughly with clean water and wipe it dry. It is not recommended to use rough or abrasive materials and corrosive or bleaching substances to prevent damaging the surface of the product.

For more stubborn dirt, use a 10% citric acid solution with water. Apply the solution to the product for 2 to 3 minutes. After that time, rinse the product thoroughly with clean water and wipe it dry. If necessary, the process can be repeated. Residues from hair dye, lipstick or other products with a dyeing effect should be removed from the surface immediately to prevent the formation of permanent marks.
