

## YOSEMITE | hand shower set

---

### Finish: polished gold (GL)

The OMNIRES YOSEMITE collection stands out for its multifunctionality, offering features that enhance everyday comfort. The hand shower offers five types of water stream – massage, mist, aerated rain, aerated massage, and aerated mist – allowing the product to be tailored to individual needs and preferences. Its universal, rounded design and wide colour palette make it a perfect fit for contemporary bathroom aesthetics. The wall bracket provides a secure fit and allows the hand shower's angle to be adjusted during use.

Gold is a noble finishing in an elegant, light shade and a perfectly smooth and shiny surface. The product is coated using the advanced PVD technology.

## Technologies

---

The EASY CLEAN nozzles allow the user to easily remove any limescale build up by simply wiping their silicone surface.

The product is coated using the advanced PVD technology which guarantees the highest possible durability and facilitates cleaning.

## Flow characteristics

---

## Specification

---

- hand shower, 5-function, streams: massage, mist, aerated rain, aerated massage, aerated mist
- adjustable hand shower bracket
- stainless steel flexible shower hose, length: 150 cm

## Product care

---

### What is the best way to care for a hand shower ?

Remember to regularly wipe the silicone nozzles with your hand to remove any limescale deposits that might be forming on their surface. A toothpick or toothbrush can also be used to clean the spaces in between if there is a considerable build-up of limescale.

For more stubborn dirt, it is recommended to immerse the hand shower in a 10% citric acid solution with water for about 10 minutes to soften the limescale and then wipe across the nozzles with a soft brush. It is not recommended to use rough or abrasive materials and corrosive or bleaching substances to prevent damaging the surface of the product. From time to time, it is recommended to unscrew the hand shower and flush it from the inside to remove any dirt preventing the flow of water.
