OMNIRES

TULA | kitchen tap

Finish: polished copper (CP)

The TULA collection is distinguished by its modern, elegant lines and meticulously crafted proportions. Gentle curves and defined edges form a harmonious composition, while the practical swivel spout enhances everyday comfort. The mixer is equipped with a superior quality ceramic cartridge, and the innovative technologies applied help reduce water consumption by up to 50%, while maintaining the highest level of user comfort.

Copper is a sophisticated finish with a warm red-brown hue and a perfectly smooth, lustrous surface. The product is coated using advanced PVD technology.

Certificates: Polish Declaration of Performance (B marking), Polish Hygienic Certificate PZH

Technologies

The mixer is equipped with the highest quality ceramic cartridge which ensures smooth and precise water flow control whilst guaranteeing long term product performance.

The ECO WATER technology minimizes environmental footprint by reducing the water consumption by approx. 50%, without compromising on the overall product experience.

Thanks to the AIR WATER technology, the water is soft and pleasant to the touch. The stream does not spray and it is quiet and consistent.

The product is coated using the advanced PVD technology which guarantees the highest possible durability and facilitates cleaning.

Flow characteristics

- water flow at 3 bar: 8.39 l/min
- hot water supply: max. 90 °C
- working pressure 1-5 bar
- acoustic group: I

Specification

- swivel spout
- spout reach: 20 cm
- water outflow height: 28.1 cm
- total mixer height: 38 cm

Product care

HOW TO TAKE CARE OF BATHROOM AND KITCHEN FITTINGS?

You should clean your bathroom and kitchen fittings regularly, preferably after each use, so as to prevent the build-up of hard-to-remove dirt. For daily maintenance of external surfaces, use a soft cloth (for example, a microfibre cloth) and a solution of water with

a mild cleaning agent with a natural composition. Hard-to-reach recesses and milled details can be gently cleaned with a soft brush. Then rinse the product thoroughly with clean water and wipe it dry. It is not recommended to use rough or abrasive materials and corrosive or bleaching substances to prevent damaging the surface of the product.

For more stubborn dirt, use a 10% citric acid solution with water. Apply this solution directly to the product or cover the product with a cloth soaked in the solution. After 10 minutes, rinse the product thoroughly with clean water and wipe it dry. If necessary, the process can be repeated.

WHAT IS THE BEST METHOD FOR CLEANING THE AERATOR?

Remember to regularly control the flow of water through the aerator so as to ensure its problem-free operation and protect it from damage. In the case of small contaminants in the water or “hard” water, remove the aerator once every few weeks and clean it with a brush. In the case of more stubborn dirt, we recommend soaking the aerator for 10 minutes in a 10% citric acid solution with water.
