OMNIRES

UNI | shower squeegee with telescopic handle

Finish: brushed anthracite (AT)

The telescopic shower squeegee offers both convenience and precise functionality. Its soft, flexible edge efficiently clears water and residue from flat surfaces such as glass and tiles in the shower area. The adjustable handle, extending from 63.5 to 117 cm, allows you to reach higher spots with ease. When retracted, it takes up minimal space for effortless storage.

A rotating locking mechanism keeps the handle securely in place, preventing slippage and maintaining the desired length. Crafted from high-quality brass and corrosion-resistant stainless steel, the squeegee delivers long-lasting durability and reliable performance, even when fully extended.

Its universal design and wide colour palette allow it to pair seamlessly with fittings and accessories from the OMNIRES collection.

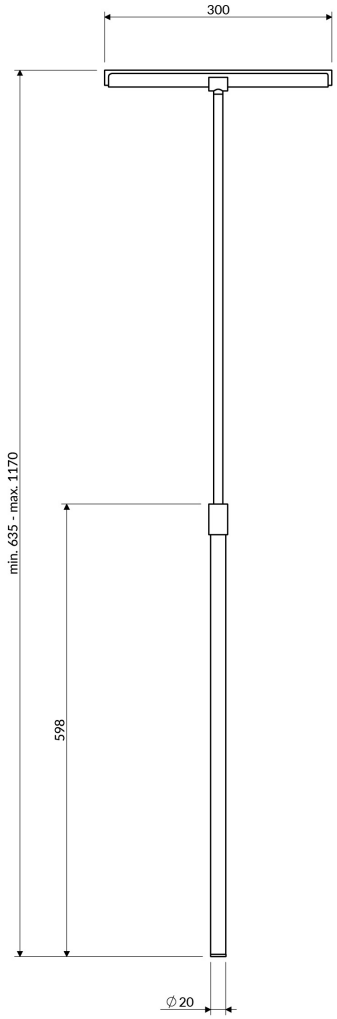

Anthracite is a modern finishing in a deep metallic shade, with a satin, brushed surface. The product is coated using the advanced PVD technology.

Technologies

The product is coated using the advanced PVD technology which guarantees the highest possible durability and facilitates cleaning.
