

UNI | Thermostatic shower system for exposed installation

Finish: polished chrome (CR)

Technologies

The mixer is equipped with the highest quality ceramic cartridge which ensures smooth and precise water flow control whilst guaranteeing long term product performance.

Thanks to the AIR WATER technology, the water is soft and pleasant to the touch, enhancing the overall showering experience.

The EASY CLEAN nozzles allow the user to easily remove any limescale from the shower head and the hand shower by simply wiping their silicone surface.

The mixer's body, the valve and the rosette are all made of high quality A-grade brass.

Developed to minimise environmental footprint, the ECO WATER technology reduces water consumption by approx. 30% without compromising on the overall product experience.

The shower head is made using the ANTI-SCALE technology. It incorporates a silicone insert that prevents internal water stagnation. Occasional tilting of the shower head, so that any stagnant water could flow out through the nozzles, guarantees long term product performance.

The product's coating, made using advanced galvanization technology, is durable and easy to clean.

Flow characteristics

- working pressure 1-10 bar
- hot water supply: max. 90 °C

Specification

- thermostatic shower mixer
- hot water lock at 38°C
- shower head (WGR225CR), dimensions: 25 x 25 cm, reach from the wall: 43 cm
- hand shower (JIMJIM-RCR), 3-function
- stainless steel flexible shower hose, length: 150 cm
- shower head/hand shower stream switch embedded in the water knob
- adjustable height, minimum/maximum system height: 80 cm/130 cm
