

UNI | thermostatic shower system for exposed installation

Finish: chrome (CR)

Technologies

The mixer is equipped with the highest quality ceramic cartridge which ensures smooth and precise water flow control whilst guaranteeing long term product performance.

Developed to minimise environmental footprint, the ECO WATER technology reduces water consumption by approx. 30% without compromising on the overall product experience.

The shower head is made using the ANTI-SCALE technology. It incorporates a silicone insert that prevents internal water stagnation. Occasional tilting of the shower head, so that any stagnant water could flow out through the nozzles, guarantees long term product performance.

The EASY CLEAN nozzles allow the user to easily remove any limescale build up by simply wiping their silicone surface.

The product is coated using the advanced electroplating technology which guarantees durability, offers good resistance to mechanical damage and facilitates cleaning.

The mixer's body, the valve and the rosette are all made of high quality A-grade brass.

Flow characteristics

- hot water supply: max. 90 °C

Specification

- thermostatic shower mixer
- hot water lock at 38°C
- shower head (WGU225CR), dimensions: 25 x 25 cm, thickness at the edge: 0.2 cm, reach from the wall: 43 cm
- hand shower (DAVISX-RCR), 3-function, streams: rain, massage, mixed
- stainless steel flexible shower hose, length: 150 cm
- shower head/hand shower stream switch embedded in the water knob
- adjustable height, minimum/maximum system height: 90 cm/130 cm
