KITCHEN TAPS
AND DISPENSERS

KITCHEN TAPS AND DISPENSERS

OMNIRES kitchen taps seamlessly blend advanced functionality, modern design, and exceptional durability. Tailored to suit individual preferences, they offer a variety of options: minimalist designs, models equipped with a drinking water filtration function, and practical features such as a pull-out spout for added convenience.

The range of dish or hand soap dispensers that can be installed in the countertop provides even greater efficiency and order in the kitchen. It is an excellent solution for those who value functionality and aesthetics in every detail.

DESIGN FOLLOWS FUNCTION

Kitchen taps stand out with their minimalist design, seamlessly complementing a wide range of interior styles. The collection offers an extensive selection of finishes, including classic chrome, matt black and white, as well as an elegant palette of polished and brushed tones, such as gold, copper, nickel, graphite, and brass.

KITCHEN TAPS AND DISPENSERS

"Our collection of kitchen taps has been thoughtfully designed to offer the perfect balance of contemporary style and practical functionality. With a wide selection of finishes and smart features like water filtration and pull-out spouts, there's a model to suit every individual need".

Paulina Shacalis & Janusz Langner, OMNIRE Studio

COMFORT AND ENERGY SAVINGS

Water filtration is among the most sought-after features in modern kitchen taps. The SWITCH collection offers intuitive access to the highest quality filtered water, and with COLD START technology, it effectively reduces energy consumption, minimising its environmental impact during daily use.

KITCHEN TAPS AND DISPENSERS

The pull-out, flexible spout of the BEND kitchen tap, equipped with a dual-function shower, offers exceptional convenience for everyday tasks. Enhanced with ECO WATER technology, it reduces water consumption by up to 50% while maintaining excellent performance and functionality.

MATERIALS AND TECHNOLOGIES

High quality, A-grade brass guarantees exceptional durability and anticorrosive features. It is also characterised by precise structure and refined finish.

All kitchen taps are equipped with superior quality ceramic cartridges that ensure smooth and precise water flow control whilst guaranteeing long-term product performance.

The **COLD START** technology used in SWITCH kitchen taps ensures that the mixer providing water for washing hands or dishes opens with cold water by default, which saves energy and prevents the needless use of hot water.

The **ECO WATER** technology, used in the BEND, VITA, TULA, and Y kitchen taps, minimises the environmental footprint by reducing water consumption (approx. 50%), without compromising on the overall product experience.

Thanks to the **AIR WATER** technology, the water across all products is soft and pleasant to the touch. The stream does not spray and it is quiet and steady, even in the event of variations in water pressure.

The filter cartridge in SWITCH kitchen taps effectively reduces chlorine and heavy metal content while lowering water hardness. The filtered water is enriched with potassium, enhancing both its quality and taste.

The advanced **PVD** technology utilised across gold, brass, copper, and nickel colour finishes guarantees the highest possible durability and facilitates cleaning.

ABOUT US

Since 1990, we have been passionate about creating high-quality products and experiences – to empower others to live in inspiring, well-considered interiors.

We believe that our common responsibility is to strive for sustainable development. That is why we design consciously to minimise our environmental footprint across our products' life span and implement measures that help reduce water and energy consumption. Our products have won numerous design and innovation awards, including: Red Dot Design Award, German Design Award, Archiproducts Design Award, Must Have award and Dobry Wzór award.
