SYSYBI2#

Instrukcja montażu i konserwacji | Installation and maintenance | Montage- und Wartungsanleitung | Notice de montage et d'entretien

- PL Po użyciu produktu należy zawsze zamknąć dopływ wody za pomocą mieszacza baterii lub zaworu. Pozostawienie ręczki bidetowej pod ciśnieniem może prowadzić do wycieków lub uszkodzeń produktu.
- EN After using the product, always shut off the water supply using the mixer or the inside stop cock. Leaving the bidet hand shower pressurized can lead to leakage or damage to the product.
- DE Nach Beendigung der Benutzung des Produkts sollte immer die Wasserzufuhr über die Armatur oder das Ventil geschlossen werden. Wenn Sie die Bidetbrause unter Druck stehen lassen, kann dies zu Leckagen oder Schäden am Produkt führen.
- FR Après avoir utilisé le produit, fermez toujours l'arrivée d'eau à l'aide du mitigeur ou de la vanne du robinet. Laisser la douchette de bidet sous pression peut entraîner une fuite ou endommager le produit.
