SWITCH

SWITCH

The SWITCH collection is the ultimate fusion of style and function – the fittings have an intriguing, expressive design and are a source of crystal-clear water. With its sophisticated details and captivating form, this innovative kitchen tap provides two separate streams of water – regular and filtered. Models with a pull-out spout further enhance everyday comfort, offering greater freedom of movement within the sink area.

DESIGN FOLLOWS FUNCTION

The contemporary design of the collection encompasses well-balanced proportions and provides intuitive operation. Cleanly defined details mark the two separate water streams – regular water through the mixer and filtered water from the spout's tip. The tap's minimalist silhouette, shaped by subtle curves, remains consistent across all variants, including models with a pull-out spout discreetly integrated into the form.

SWITCH

"My aim was to create a product that offers intuitive access to high-quality filtered water while combining practical functionality with an unconventional design language. By expanding the collection to include a pull-out spout model, we wanted to further enhance everyday comfort and freedom of movement in the kitchen, responding to the evolving needs of contemporary users".
Paulina Shacalis, OMNIRE Studio

EXTENDED FUNCTIONALITY

Models equipped with a swivel pull-out spout enhance comfort at the sink, offering greater freedom to manoeuvre both filtered water and the stream used for everyday kitchen tasks.

SWITCH

The pull-out spout provides a flexible range of movement, making it easier to rinse fruit and vegetables, wash and fill cookware, and thoroughly clean the entire sink area, enhancing the comfort of everyday kitchen use.

SOURCE OF HEALTH

Crystalline purity at your fingertips – simply twist the ribbed ring at the tip of the spout to fill your glass with freshly filtered drinking water of exceptional quality and taste, available straight from your kitchen tap.

SWITCH

The use of the Dafi filter cartridge, with its activated carbon and resin technology, reduces the content of chlorine and heavy metals while lowering the hardness of the water. The filtered water is enriched with the essential mineral of potassium, which also gives it a great flavour.

SUSTAINABLE SOLUTION

The mixer used for washing hands or dishes features COLD START technology. Opening with cold water as standard, it helps conserve energy, reduce unnecessary hot water consumption and minimise CO₂ emissions.

SWITCH

The engraved labelling on the mixer ensures intuitive operation, while the decorative ribbed, anti-slip texture provides a secure grip and comfortable handling, even with wet hands.

MATERIALS AND TECHNOLOGIES

High-quality, A-grade brass ensures exceptional durability and anti-corrosion properties. It is also characterised by precise craftsmanship and a refined finish.

The superior-quality ceramic cartridge ensures smooth and precise water flow control whilst supporting long-term product performance and reliable operation.

The **COLD START** technology ensures that the mixer providing water for washing hands or dishes opens with cold water by default, which saves energy and prevents the needless use of hot water.

Advanced **AIR WATER** aerators enrich the water with air, making it soft and pleasant to the touch while ensuring a quiet, even flow and a gentle, comfortable stream of water.

The use of the filter cartridge reduces the content of chlorine and heavy metals while lowering the hardness of the water. The filtered water is enriched with potassium, which also gives it a great flavour.

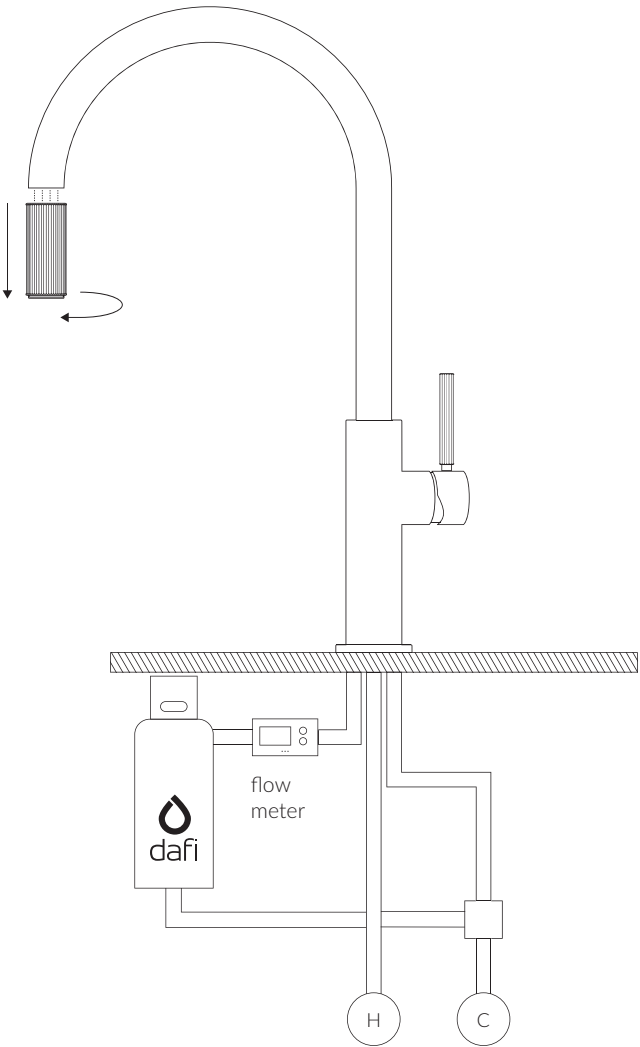

The rotating pull-out spout featured in selected models allows precise control of the water stream, makes it easier to fill pots and containers, and ensures complete freedom of movement at the sink.

The advanced **PVD** technology, used to produce coatings on products in gold, brass, copper, and nickel colours, delivers the highest possible durability and facilitates cleaning.

SWITCH

The SWITCH tap is available separately or as part of a set with a water filtration system featuring a filter cartridge and a precise flow meter by Dafi. Selected models are additionally equipped with a pull-out spout, enhancing flexibility and convenience within the sink area.

ARRANGEMENT FLEXIBILITY

SWITCH

The collection's extensive colour palette allows endless design possibilities and provides a choice of hues to suit any project. SWITCH collection comes in black, white, and a wide range of metallic finishes.

The kitchen tap is available as a set with Dafi water filtration system or separately, with a set of versatile connectors allowing it to be installed with any system.

SWITCH

Since 1990, we have been passionate about creating high-quality products and experiences – to empower others to live in inspiring, well-considered interiors.

We believe that our common responsibility is to strive for sustainable development. That is why we design consciously to minimise our environmental footprint across our products' life span and implement measures that help reduce water and energy consumption. Our products have won numerous design and innovation awards, including: Red Dot Design Award, German Design Award, Archiproductions Design Award, Must Have award and Dobry Wzór award.
