SWITCH

SWITCH

The SWITCH collection is the ultimate fusion of style and function – the fittings have an intriguing, expressive design and are a source of crystal-clear water. With its sophisticated details and captivating form, this innovative kitchen tap provides two separate streams of water – regular and filtered.

DESIGN FOLLOWS FUNCTION

The contemporary design of the collection encompasses well-balanced proportions and provides intuitive operation. Cleanly defined details mark the two separate water streams – regular water through the mixer and filtered water from the spout's tip. These distinctive elements are offset by the minimalist line featuring subtle curves.

SWITCH

“My aim was to create a product that provides intuitive access to the highest quality filtered water and combines practical functionality with unconventional design. Our cooperation with Dafi, the leading Polish brand of filtered cartridges, has resulted in a solution that will contribute to the quality of our lives and help care for our planet”.

Paulina Shacalis, OMNIRE Studio

SOURCE OF HEALTH

Crystalline purity at your fingertips – simply twist the ribbed ring at the tip of the spout to fill your glass with crystal clear, fresh drinking water.

SWITCH

The use of the Dafi filter cartridge, with its activated carbon and resin technology, reduces the content of chlorine and heavy metals while lowering the hardness of the water. The filtered water is enriched with the essential mineral of potassium, which also gives it a great flavour.

## SUSTAINABLE SOLUTION

The mixer providing water for washing hands or dishes is fitted with COLD START technology. This means that the mixer opens with cold water by default, which saves energy, prevents the needless use of hot water and eliminates unnecessary CO<sub>2</sub> emissions.

## SWITCH

Labelling milled onto the mixer makes use fully intuitive, while the decorative ribbed anti-slip surface ensures that wet hands do not slip away from the mixer's surface.

High quality, A-grade brass guarantees exceptional durability and anticorrosive features. It is also characterised by precise structure and refined finish.

The superior quality ceramic cartridge ensures smooth and precise water flow control whilst guaranteeing long-term product performance.

The **COLD START** technology ensures that the mixer providing water for washing hands or dishes opens with cold water by default, which saves energy and prevents the needless use of hot water.

Thanks to the **AIR WATER** technology, the water is soft and pleasant to the touch. The stream does not spray and it is quiet and steady, even in the event of variations in water pressure.

The use of the filter cartridge reduces the content of chlorine and heavy metals while lowering the hardness of the water. The filtered water is enriched with potassium, which also gives it a great flavour.

The advanced **PVD** technology, used to produce coatings on products in gold, brass, copper, and nickel colours, guarantees the highest possible durability and facilitates cleaning.

The kitchen tap is available separately or as a set with the water filtration system, equipped with a filter and a precise water flow meter provided by Dafi.

## ARRANGEMENT FLEXIBILITY

## SWITCH

The collection's extensive colour palette allows endless design possibilities and provides a choice of hues to suit any project. SWITCH collection comes in black, white, and a wide range of metallic finishes.

The kitchen tap is available as a set with Dafi water filtration system or separately, with a set of versatile connectors allowing it to be installed with any system.

Since 1990, we have been passionate about creating high-quality products and experiences – to empower others to live in inspiring, well-considered interiors.

We believe that our common responsibility is to strive for sustainable development. That is why we design consciously to minimise our environmental footprint across our products' life span and implement measures that help reduce water and energy consumption. Our products have won numerous design and innovation awards, including: Red Dot Design Award, German Design Award, Archiproducts Design Award, Must Have award and Dobry Wzór award.
