OMNIRES SWITCH

Kitchen tap with a water filtering system

The kitchen tap from the OMNIREs SWITCH collection is a perfect combination of innovation and thoughtful design. Minimalist in form and equipped with an intuitive water filtration system, it was designed by Paulina Shacalis. The project was born out of a passion for distinctive forms, colours and practical design solutions that respond to the needs of contemporary users. This innovative product – distinguished by sophisticated detailing, striking aesthetics and a unique colour palette – provides two separate water streams: regular and filtered.

BEAUTY AND FUNCTIONALITY

The SWITCH kitchen tap features an elegant, streamlined silhouette, minimalist lines and refined ribbed detailing. Beyond their visual appeal, these elements serve a practical purpose by enabling effortless access to crystal-clear drinking water. The spout is fitted with a milled ring that can be gently twisted to dispense filtered water directly into a glass. Designed for maximum comfort and control, this decorative yet functional detail ensures a secure grip, even with wet hands. Made from high-quality brass, the mixer delivers a smooth, even water flow while minimising splashing.

”

My aim was to create a product that offers intuitive access to the highest quality filtered water while combining practical functionality with unconventional design. Our collaboration with the Polish brand DAFI has resulted in a solution that enhances everyday comfort and supports care for our planet.

Paulina Shacalis, OMNIRE Studio

THE NOBILITY OF COLOUR

The SWITCH collection is available in twelve attractive finishes with varying textures: gloss, brushed and matt. Inspired by noble materials, the colour palette allows users to highlight the individual character and style of their kitchen interiors. The range features brushed finishes such as brass, gold, copper, graphite, nickel, antique bronze and antique copper. Gloss finishes include chrome, gold and copper, while white and black are offered in an elegant matt finish.

COMFORT AND HEALTH

The SWITCH kitchen tap has been perfected down to the finest detail to ensure everyday comfort while addressing environmental responsibility. With a single, intuitive movement, users gain access to crystal-clear drinking water. The water filtration system, developed in collaboration with DAFI, reduces chlorine and heavy metals, lowers water hardness, and enriches the water with

potassium, significantly improving its taste and quality.

The system also continuously monitors filtered water consumption, providing full control over water purity. In addition, the SWITCH kitchen tap's ceramic cartridge is equipped with COLD START technology, meaning the tap opens with cold water by default — helping to reduce unnecessary hot water use and save energy.

ABOUT THE DESIGNER

Paulina Shacalis, Managing and Creative Director of the OMNIREs brand, is a product designer, strategist and visionary. She oversees the brand's design and strategic direction. Her collections of baths, basins and fittings have received widespread recognition in both national and international competitions, including the Red Dot Design Award, German Design Award, Must Have and Dobry Wzór. Treating her designs as a form of art, she simultaneously emphasises functionality and the product life cycle. Paulina believes that true success in the architecture sector stems from innovation and a passion for outstanding and conscious design.

ABOUT US

OMNIREES is a respected Polish manufacturer of premium bathroom and kitchen fittings, offering a broad range of high-quality solutions distinguished by exceptional design. Founded in 1990, the brand's mission is to empower others to create thoughtful, inspiring interiors.

Each product is developed with meticulous attention to detail and life-cycle analysis, incorporating technologies that promote water and energy efficiency.

Created in collaboration with renowned designers, OMNIREES collections stand out for their distinctive aesthetics, innovative materials and advanced engineering.

The brand's international reputation is confirmed by numerous awards, including Red Dot, iF and the German Design Award.
