

Y | 4-hole bath mixer

Finish: polished copper (CP)

The OMNIRES Y collection thrills with its simple line and an impeccable form which expresses the passion in pursuit for the ideal. The design has been inspired by and based on the shape of a circle. Its timeless and perfectly refined design, created in the spirit of minimalism, offers the maximum of interior design options.

Made of high grade brass, the mixer is equipped with a superior quality ceramic cartridge.

Copper is a sophisticated finish with a warm red-brown hue and a perfectly smooth, lustrous surface. The product is coated using advanced PVD technology.

Design: Janusz Langner, OMNIRES Studio

Certificates: Polish Declaration of Performance (B marking), Polish Hygienic Certificate PZH

Technologies

The mixer is equipped with the highest quality ceramic cartridge which ensures smooth and precise water flow control whilst guaranteeing long term product performance.

Aerators, shower heads, hand showers and jets made with resilient, EASY CLEAN nozzles allow the user to remove any limescale simply through wiping the silicone surface.

Thanks to the AIR WATER technology, the water is soft and pleasant to the touch. The stream does not spray and it is quiet and consistent, even if any variations in water pressure occur.

The bath mixer with the integrated SMART FIX system allows for the shower hose to be easily replaced, if desired, without the need to dismantle the bath.

The product is coated using the advanced PVD technology which guarantees the highest possible durability and facilitates cleaning.

The mixer's body, the valve and the rosette are all made of high quality A-grade brass.

Flow characteristics

- water flow at 3 bar: 26 l/min
- hot water supply: max. 90 °C
- noise class: II/I

Specification

- spout reach: 19 cm
- water outflow height: 16.5 cm
- brass hand shower, 1-function
- brass flexible shower hose, length: 180 cm

Product care

How to take care of bathroom and kitchen fittings?

You should clean your bathroom and kitchen fittings regularly, preferably after each use, so as to prevent the build-up of hard-to-remove dirt. For daily maintenance of external surfaces, use a soft cloth (for example, a microfibre cloth) and a solution of water with a mild cleaning agent with a natural composition, then rinse the product thoroughly with clean water and wipe it dry. It is not recommended to use rough or abrasive materials and corrosive or bleaching substances to prevent damaging the surface of the product.

For more stubborn dirt, use a 10% citric acid solution with water. Apply this solution directly to the product or cover the product with a cloth soaked in the solution. After 10 minutes, rinse the product thoroughly with clean water and wipe it dry. If necessary, the process can be repeated.

What is the best method for cleaning the aerator?

Remember to regularly control the flow of water through the aerator so as to ensure its problem-free operation and protect it from damage. In the case of small contaminants in the water or "hard" water, remove the aerator once every few weeks and clean it with a brush. In the case of more stubborn dirt, we recommend soaking the aerator for 10 minutes in a 10% citric acid solution with water.

What is the best way to care for a hand shower ?

Remember to regularly wipe the silicone nozzles with your hand to remove any limescale deposits that might be forming on their surface. A toothpick or toothbrush can also be used to clean the spaces in between if there is a considerable build-up of limescale.

For more stubborn dirt, it is recommended to immerse the hand shower in a 10% citric acid solution with water for about 10 minutes to soften the limescale and then wipe across the nozzles with a soft brush. It is not recommended to use rough or abrasive materials and corrosive or bleaching substances to prevent damaging the surface of the product. From time to time, it is recommended to unscrew the hand shower and flush it from the inside to remove any dirt preventing the flow of water.
