

## Y | 5-hole bath mixer for concealed installation

---

### Finish: polished copper (CP)

The OMNIRES Y bath mixer for concealed installation with integrated hand shower thrills with its simple line and an impeccable form which expresses the passion in pursuit for the ideal. The design has been inspired by and based on the shape of a circle. Its timeless and perfectly refined design, created in the spirit of minimalism, offers the maximum of interior design options. A spout with an appropriate length ensures comfortable use even in smaller spaces and thanks to its symmetric form, the bath mixer and the bath are perfectly tuned, creating a harmonious composition. The concealed installation guarantees the economy of space and the ease of cleaning.

Copper is a sophisticated finish with a warm red-brown hue and a perfectly smooth, lustrous surface. The product is coated using advanced PVD technology.

Design: Paulina Shacalis, OMNIRES Studio

## Technologies

---

The mixer is equipped with the highest quality ceramic cartridge which ensures smooth and precise water flow control whilst guaranteeing long term product performance.

Thanks to the AIR WATER technology, the water is soft and pleasant to the touch. The stream does not spray and it is quiet and consistent, even if any variations in water pressure occur.

The product is coated using the advanced PVD technology which guarantees the highest possible durability and facilitates cleaning.

The mixer's body, the valve and the rosette are all made of high quality A-grade brass.

## Flow characteristics

---

- working pressure 1-5 bar
- water flow at 3 bar: 20 l/min
- hot water supply: max. 90 °C

## Specification

---

- rosette dimensions: ø7.2 cm
- spout reach from tiled surface: 15.5-16.7 cm
- minimum wall depth: 6.4 cm
- two 1/2" inlets (cold and hot water)
- brass hand shower, 1-function
- stainless steel flexible shower hose, length: 125 cm
- built-in parts included

## Product care

---

### How to take care of bathroom and kitchen fittings?

You should clean your bathroom and kitchen fittings regularly, preferably after each use, so as to prevent the build-up of hard-to-remove dirt. For daily maintenance of external surfaces, use a soft cloth (for example, a microfibre cloth) and a solution of water with a mild cleaning agent with a natural composition, then rinse the product thoroughly with clean water and wipe it dry. It is not recommended to use rough or abrasive materials and corrosive or bleaching substances to prevent damaging the surface of the product.

For more stubborn dirt, use a 10% citric acid solution with water. Apply this solution directly to the product or cover the product with a cloth soaked in the solution. After 10 minutes, rinse the product thoroughly with clean water and wipe it dry. If necessary, the process can be repeated.

### What is the best way to care for a hand shower ?

Remember to regularly wipe the silicone nozzles with your hand to remove any limescale deposits that might be forming on their surface. A toothpick or toothbrush can also be used to clean the spaces in between if there is a considerable build-up of limescale.

For more stubborn dirt, it is recommended to immerse the hand shower in a 10% citric acid solution with water for about 10 minutes to soften the limescale and then wipe across the nozzles with a soft brush. It is not recommended to use rough or abrasive materials and corrosive or bleaching substances to prevent damaging the surface of the product. From time to time, it is recommended to unscrew the hand shower and flush it from the inside to remove any dirt preventing the flow of water.
