

CLICK-CLACK | click clack basin and bidet waste

Finish: brushed antique bronze (BR)

Click-clack wastes are practical accessories designed for effortless opening and closing of the water drain. Their intuitive mechanism ensures ease of use – one press closes the drain, another opens it. Suitable for basins and bidets with or without an overflow, they provide a watertight fit and straightforward installation. The minimalist design, free from visible mechanical elements, helps reduce the build-up of dirt and limescale around the drain.

Brushed antique bronze is an original finish with a brown-gold hue and a vintage-inspired texture.

Certificates: Polish Declaration of Performance (B marking), Polish Hygienic Certificate PZH
