## CLASSICA M+ | countertop basin, 61 x 40 cm

#### Finish: gloss white (BP)

The OMNIRES CLASSICA countertop basin is an ingenious combination of modernity and the most stunning classical principles. The distinctive profiling, the gently curved rim and the perfect oval shape of the bowl make the basin individually unique. Its optimum width ensures impressive comfort of use, while the matching waste cover gives the basin an elegant and smart look.

The basin is made of a composite material M+ whose main component is dolomite rock. The innovative production technology guarantees impeccable execution of every detail while ensuring remarkable durability and resistance.

The gleaming surface of the basin, naturally reflecting the light, has a finish in classic white.

Design: Paweł Gliński, Marmite

### Technologies

The product is made of an innovative composite material, M+, which is exceptionally durable, as well as resistant to damage, pressure and extreme temperatures.

Perfectly smooth product surface is free from any ruptures of micro openings, where bacteria and germs could grow. It is also easy to clean and maintain.

Product surface is warm to the touch. Water maintains its temperature for longer, both maximising the user experience and saving energy. even, and dimensions precisely match the technical drawing (tolerance 0-3 mm). The product is very pleasant to the touch. The satin finish resembles a smooth stone that has been

polished by water.

The material provides highly desirable, precise

finishing. Product surface is perfectly smooth and

///

Thanks to its high density, M+ composite provides exceptional acoustic absorption. Sound of the falling water is minimised.

# Specification

- length: 61 cm
- width: 40 cm
- height: 14 cm
- no overflow
- drain cover included
- net weight: 12.33 kg
- gross weight: 13.7 kg

### Product care

#### How to protect and clean composite and ceramic products?

Products made from M+ composite material and ceramics should be cleaned regularly, preferably after each use, so as to prevent the build-up of hard-to-remove dirt. For daily maintenance of external surfaces, use a soft cloth (for example, a microfibre cloth) and a solution of water with a mild cleaning agent with a natural composition, then rinse the product thoroughly with clean water and wipe it dry. It is not recommended to use rough or abrasive materials and corrosive or bleaching substances to prevent damaging the surface of the product.

For more stubborn dirt, use a 10% citric acid solution with water. Apply the solution to the product for 2 to 3 minutes. After that time, rinse the product thoroughly with clean water and wipe it dry. If necessary, the process can be repeated. Residues from hair dye, lipstick or other products with a dyeing effect should be removed from the surface immediately to prevent the formation of permanent marks.
