OMNIRES

BEND | kitchen tap with pull-out spout

Finish: polished chrome (CR)

The BEND collection showcases an elegant, minimalist design inspired by the harmonious interplay of circles and curves. The kitchen taps are equipped with a swiveling, pull-out spout with a dual-function shower, providing extended reach of the water flow and enhancing user comfort. The mixer is equipped with a superior quality ceramic cartridge, and the innovative technologies applied help reduce water consumption by up to 50%, while maintaining the highest level of user comfort.

Chrome is a versatile finishing in a silvery colour, with the perfectly even and lustrous surface.

Technologies

The mixer is equipped with the highest quality ceramic cartridge which ensures smooth and precise water flow control whilst guaranteeing long term product performance.

The ECO WATER technology minimizes environmental footprint by reducing the water consumption by approx. 50%, without compromising on the overall product experience.

Thanks to the AIR WATER technology, the water is soft and pleasant to the touch. The stream does not spray and it is quiet and consistent.

The swivel pull-out spout allows precise control of the water flow, makes filling pots and containers easier, and ensures complete freedom of movement at the sink.

The product's coating, made using advanced galvanization technology, is durable and easy to clean.

Flow characteristics

- working pressure 1-5 bar

Specification

- swivel, pull-out spout
- spout reach: 23.5 cm
- water outflow height: 20.5 cm
- total mixer height: 45 cm
- 2-function hand shower

Product care

HOW TO TAKE CARE OF BATHROOM AND KITCHEN FITTINGS?

You should clean your bathroom and kitchen fittings regularly, preferably after each use, so as to prevent the build-up of hard-to-

remove dirt. For daily maintenance of external surfaces, use a soft cloth (for example, a microfibre cloth) and a solution of water with a mild cleaning agent with a natural composition. Hard-to-reach recesses and milled details can be gently cleaned with a soft brush. Then rinse the product thoroughly with clean water and wipe it dry. It is not recommended to use rough or abrasive materials and corrosive or bleaching substances to prevent damaging the surface of the product.

For more stubborn dirt, use a 10% citric acid solution with water. Apply this solution directly to the product or cover the product with a cloth soaked in the solution. After 10 minutes, rinse the product thoroughly with clean water and wipe it dry. If necessary, the process can be repeated.

WHAT IS THE BEST METHOD FOR CLEANING THE AERATOR?

Remember to regularly control the flow of water through the aerator so as to ensure its problem-free operation and protect it from damage. In the case of small contaminants in the water or “hard” water, remove the aerator once every few weeks and clean it with a brush. In the case of more stubborn dirt, we recommend soaking the aerator for 10 minutes in a 10% citric acid solution with water.
