Product care

HOW TO TAKE CARE OF
A SHOWER HEAD?

Remember to regularly wipe the silicone nozzles with your hand to remove any limescale deposits that might be forming on their surface. Avoid using harsh cleaning agents that may damage the nozzles and the surface of the shower head.

The shower head should be angled after each use to allow the remaining water to flow out. This is the easiest yet necessary way to reduce the build-up of limescale from the water inside the shower head. Tilting the shower head additionally reduces the risk of the product becoming prone to leaking, allowing the product to serve its purpose reliably for an extended time.
