OMNIRES

LEGS | shower tray legs

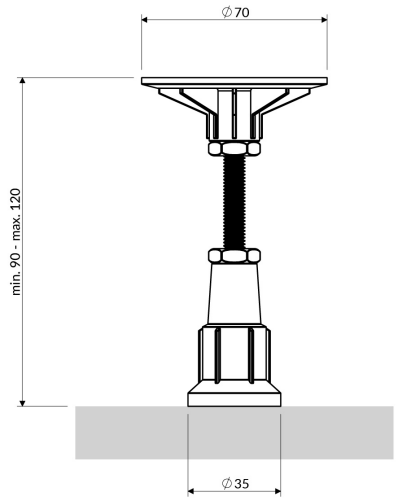

Shower tray legs are a practical solution that, thanks to their adjustable height, allow for precise leveling of the tray even on uneven surfaces, ensuring efficient water drainage and enhanced comfort.

They also provide the necessary clearance for a shower waste and drain pipes, which is particularly important when floor modifications are not possible. The product is designed for shower trays from the OMNIRES AQUAPURE and OMNIRES AQUAROCK collections, ensuring a perfect fit and structural stability.
