OMNIRES

STONE | composite shower tray, stone texture, 90 x 100 cm

Finish: matt black (BLM)

The shower tray is made of multilayer composite material to ensure extraordinary durability and strength. The matt surface of the shower tray with a natural stone texture effect is coated using CleanShield anti-bacterial technology. The coating enhances the tray's antimicrobial properties and makes cleaning easier. The stabilising layer reinforces the shower tray while providing thermal and acoustic insulation. The sealing layer protects against moisture and mould formation. The tray can be installed on top of the floor surface or flush with the floor. It can also be cut to perfectly fit the space available in the bathroom.

Technologies

The shower tray is made using the innovative STABILSOUND PLUS technology. Thanks to the multilayer construction reinforced with Stonicryl® it is extremely durable, stable and resistant to pressure.

The shower tray is coated with the CLEAN SHIELD technology. An anti-bacterial and anti-allergy coating enhances its hygienic properties, and makes it easy to clean and maintain.

Thanks to the modern construction and high quality materials, the shower tray keeps its heat for longer.

The product effectively muffles the sound of the falling water reducing it by 40%.

Thanks to the EASY MOUNT system, the shower tray may be installed drill-free; on top of the bathroom floor or flush with the tiles.

The shower tray can be cut to fit the space available in the bathroom.

Specification

- side 1: 90 cm
- side 2: 100 cm
- height: 3 cm
- depth: 1.5 cm
- anti-slip surface
- with integrated panel
- drain dimension: ø9 cm
- shower tray waste not included (choose)

Product care

HOW TO PROPERLY CLEAN A SHOWER TRAY?

Shower trays should be cleaned regularly, preferably after each use, so as to prevent the build-up of hard-to-remove dirt. For daily maintenance of surfaces, use a soft cloth (for example, a microfibre cloth) and a solution of water with a mild cleaning agent with a natural composition. After cleaning the shower tray, rinse it thoroughly with clean water and wipe it dry. It is not recommended to use rough or abrasive materials and corrosive or bleaching substances to prevent damaging the surface of the product.

For more stubborn dirt, use a 10% citric acid solution with water. Apply the solution to the product for 2 to 3 minutes. After that time, rinse the product thoroughly with clean water and wipe it dry. If necessary, the process can be repeated. Residues from hair dye, lipstick or other products with a dyeing effect should be removed from the surface immediately to prevent the formation of permanent marks.
