OMNIRES

TRAP | space-saving basin bottle trap

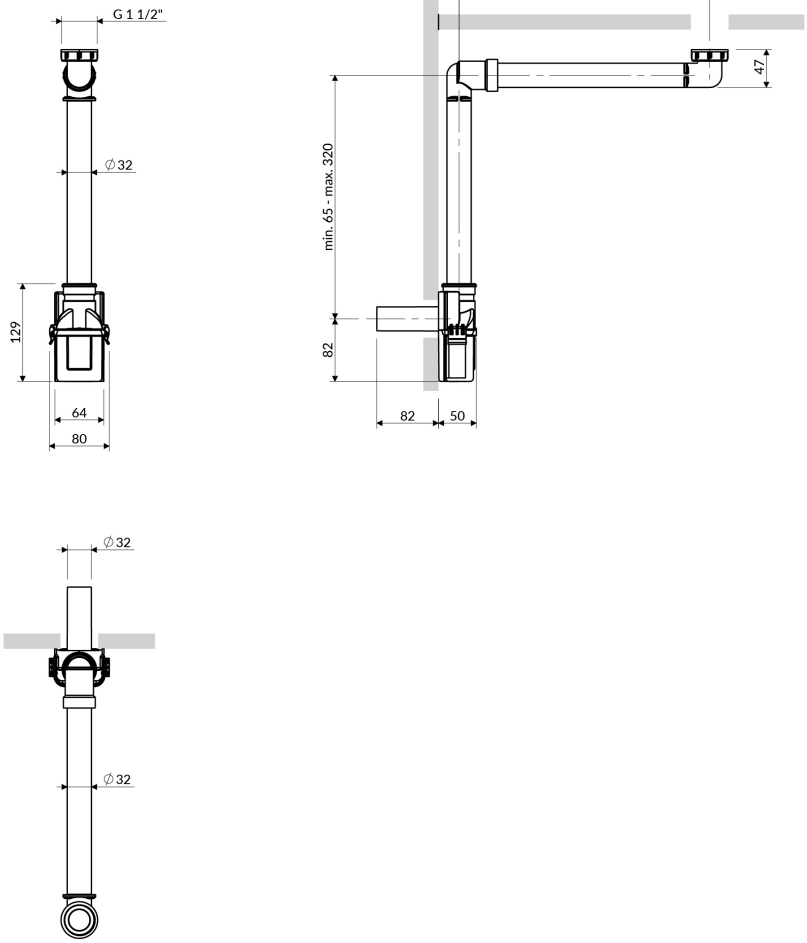

The OMNIRES space-saving basin bottle trap has been designed with functional use of the space beneath a basin, easy installation and convenient cleaning in mind. Positioned close to the wall, the trap body is only 5 cm in depth, preserving the full usable space of the drawers without the need for additional cut-outs. An extensive range of height and length adjustment, together with a swivel arm, makes it easy to adapt the trap to the existing installation, while snap-fit fastenings allow the trap cup to be quickly removed and any debris cleared without the need for tools.

Certificates: Polish Declaration of Performance (B marking), Polish Hygienic Certificate PZH

Specification
