OMNIRES

BEYOND | tall basin mixer

Finish: polished chrome / brushed (CRCB)

Designed by Maja Ganszyniec, BEYOND is part of the OMNIRES Signature Collection – a portfolio representing the fullest expression of the brand's design ambitions. Its distinctive form draws on modernism, combining clarity of geometry with subtle understated curves. The slender spout and subtle mixer handle create an elegant, architectural composition of exceptional visual lightness. The option of installation with a rosette at the base or in a more minimalist, rosette-free configuration offers even greater freedom in shaping the character of the basin area. The cascading stream, reminiscent of a natural waterfall, gently envelops the skin and brings a sensual dimension to everyday rituals.

Made from high-grade brass and fitted with a high-quality ceramic cartridge, the mixer combines durability with reliable performance. The aerator that creates a soft, air-enriched stream enhances everyday comfort. It also reduces water flow, supporting the responsible use of resources.

Chrome is a versatile silver finish. The distinctive combination of polished and brushed textures across different surfaces creates a subtle play of shifting light reflections, highlighting the depth of the finish and the precision of every detail.

Design: Maja Ganszyniec, Maja Ganszyniec Studio
Awards: Red Dot Design Award 2025, German Design Award 2027

Certificates: Polish Declaration of Performance (B marking), Polish Hygienic Certificate PZH

Technologies

The mixer is equipped with the highest quality ceramic cartridge which ensures smooth and precise water flow control whilst guaranteeing long term product performance.

The ECO WATER technology minimizes environmental footprint by reducing the water consumption by approx. 50%, without compromising on the overall product experience.

Thanks to the AIR WATER technology, the water is soft and pleasant to the touch. The stream does not spray and it is quiet and consistent.

The product's coating, made using advanced galvanization technology, is durable and easy to clean.

The mixer's body, the valve and the rosette are all made of high quality A-grade brass.

Flow characteristics

- working pressure 1-5 bar
- water flow at 3 bar: 6.72 l/min

Specification

- mixer can be installed with or without a rosette

- spout reach: 20.5 cm
- water outflow height: 23.7 cm
- total mixer height: 35.4 cm
- maximum countertop thickness: 3.5 cm

Product care

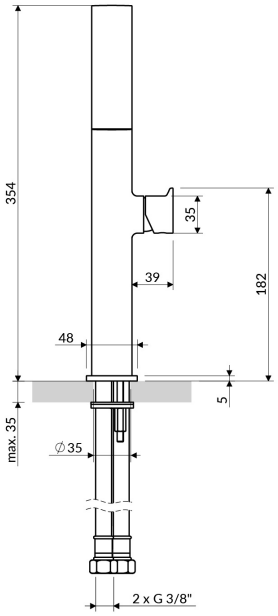

HOW TO TAKE CARE OF BATHROOM AND KITCHEN FITTINGS?

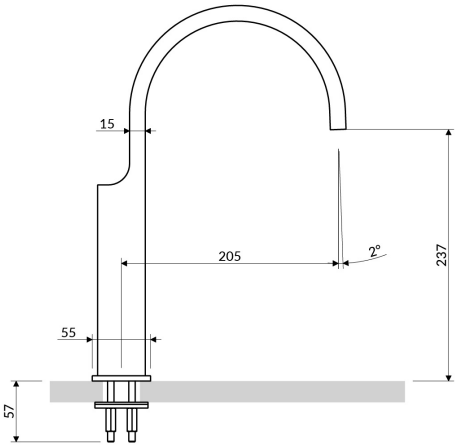

You should clean your bathroom and kitchen fittings regularly, preferably after each use, so as to prevent the build-up of hard-to-remove dirt. For daily maintenance of external surfaces, use a soft cloth (for example, a microfibre cloth) and a solution of water with a mild cleaning agent with a natural composition. Hard-to-reach recesses and milled details can be gently cleaned with a soft brush. Then rinse the product thoroughly with clean water and wipe it dry. It is not recommended to use rough or abrasive materials and corrosive or bleaching substances to prevent damaging the surface of the product.

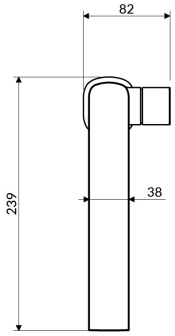

For more stubborn dirt, use a 10% citric acid solution with water. Apply this solution directly to the product or cover the product with a cloth soaked in the solution. After 10 minutes, rinse the product thoroughly with clean water and wipe it dry. If necessary, the process can be repeated.

WHAT IS THE BEST METHOD FOR CLEANING THE AERATOR?

Remember to regularly control the flow of water through the aerator so as to ensure its problem-free operation and protect it from damage. In the case of small contaminants in the water or “hard” water, remove the aerator once every few weeks and clean it with a brush. In the case of more stubborn dirt, we recommend soaking the aerator for 10 minutes in a 10% citric acid solution with water.
