OMNIRES

YOSEMITE | wall-mounted shower column

Finish: polished gold (GL)

The OMNIRES YOSEMITE collection stands out for its multifunctionality, offering features that enhance everyday comfort. The hand shower offers five water flow options – massage, mist, aerated rain, aerated massage, and aerated mist – while the shower head provides a soothing, even stream of water for deep relaxation. The shower column can be paired with any exposed shower or bath mixer, allowing you to create a configuration perfectly tailored to any bathroom's style and functionality.

Gold is a noble finishing in an elegant, light shade and a perfectly smooth and shiny surface. The product is coated using the advanced PVD technology.

Technologies

The shower head is made using the ANTI-SCALE technology. It incorporates a silicone insert that prevents internal water stagnation. Occasional tilting of the shower head, so that any stagnant water could flow out through the nozzles, guarantees long term product performance.

The EASY CLEAN nozzles allow the user to easily remove any limescale build up by simply wiping their silicone surface.

The product is coated using the advanced PVD technology which guarantees the highest possible durability and facilitates cleaning.

Flow characteristics

- working pressure 1-5 bar

Specification

- to be mounted with any shower or bath mixer for exposed installation
- shower column with diverter and shower head arm
- distance between mounting brackets: 73 cm
- brass shower head dimensions: ø25 cm, arm reach from the wall: ~41 cm
- hand shower (YOSEMITE-RGL), 5-function, streams: massage, mist, aerated rain, aerated massage, aerated mist
- stainless steel flexible shower hose, length: 150 cm
- connecting hose for shower mixer
- swivel arm
- adjustable height, minimum/maximum system height: 87 cm/114 cm

Product care

WHAT IS THE BEST WAY TO CARE FOR A HAND SHOWER ?

Remember to regularly wipe the silicone nozzles with your hand to remove any limescale deposits that might be forming on their surface. A toothpick or toothbrush can also be used to clean the spaces in between if there is a considerable build-up of limescale.

For more stubborn dirt, it is recommended to immerse the hand shower in a 10% citric acid solution with water for about 10 minutes to soften the limescale and then wipe across the nozzles with a soft brush. It is not recommended to use rough or abrasive materials and corrosive or bleaching substances to prevent damaging the surface of the product. From time to time, it is recommended to unscrew the hand shower and flush it from the inside to remove any dirt preventing the flow of water.
